

# Insulate your Roof... But not alone

**Lieu:** France (Central Mountain Area)

## Dates

26th of April, 2013 – 31st of March 2015. Project continued and spread to a larger territory.

## Type of cooperation

Interterritorial

## Partners

LAG Parc naturel régional de Millevaches (Regional Natural Park)  
LAG Beaujolais Vert  
Energies pour Demain (association)  
L'Arban (permanent workshop for urban planning and housing)  
RURENER

## Key numbers:

In 2016: **65 requests** for roof insulation; **40 registrations** for Isole-Toit support; **23 demands for renovation work** entirely realized by local craftspeople; **1 construction work finished and more in progress.**

## Project's objectives:

- 1/ Establish a campaign to mobilize and raise awareness of individuals and municipalities about renovation, in particular roof, responsible for high-energy consumption;
- 2/ Lead a communication campaign, inform on funding opportunities and current regulations (creation of a renovation guide);
- 3/ Promote grouped purchase for local bio-based insulating material: commit to a collective approach that facilitates the allocation of funding and allows lowering the costs.

## Operational objectives

- Build innovative projects with other territories to lower the costs (economy of scale);
- Support municipalities and inhabitants towards energy neutrality with concrete actions;
- Improve local knowledge and skills thanks to the sharing of experiences and information;
- Open perspectives on new ways to work collectively.

## Description of actions

- Meetings every 2-3 months with local representatives of the Natural Regional Park of Millevaches;
- Public meetings for passing on information to municipalities and private individuals;
- Training component: test construction sites for job-seekers, craftspersons, etc, and creation of a "test construction site" used as an example of energetic renovation.

## Levers for the project

Meetings and presentations of the project ahead of its start to mobilize all actors.

## Barriers to the project

No specific barrier identified

## Added value of cooperation

- Gather strengths of the two territories involved in terms of technics
- Lower the costs by working on a larger territory the project impacted more people and allowed to make economies of scale and to benefit from advantageous prices for insulating material for both the population and the municipalities.

## Budget

<b>Ressources</b>		
<b>Financement</b>	<b>Montant</b>	<b>Part en %</b>
Europe (FEADER)	60 500.00 €	55%
